I've been prescribed gabapentin 1200 mg a day for 8 years. I'm anxious everyday, I can't work because I'm so depressed, anxious, and drained. I can't even drink caffeine. My mood is at the lowest it's ever been. This drug is causing me to have scary thoughts and I'm terrified of withdrawal. I sweat, get cold way too easily as it is at this dose. Oct 15, 2011 · I'm prescribed 4 600mg Gabapentin a day for over 8 yrs so in my non-doctor opinion I wouldn't sweat that WITH THAT DRUG anything else like the other poster had said don't mess with it without talking to a doctor. I was 32 when I started taking that high of a dose, if you're older than that or have liver or TEENney problems I'd also check with a doc. Mar 12, 2020 · I go for pain mana i take Neurontin (gabapentin) 300mg 3x a day and have been getting pain management and neither works 2 doctor answers • 6 doctors weighed in Prescribed adderal ir 30mg 3x day & neurontin (gabapentin) 1200 mg (nerve

damage) can I take neurontin (gabapentin) at night as one dose?. Oct 11, 2012 · At higher doses (1,800 mg/day), gabapentin is used for adjuvant treatment of cancer pain, but pain scores in this clinical study population were low and did not appear to underlie declines in. Jun 29, 2021 · Most recently, he prescribed upwards of 3600 mg of gabapentin to be taken at bedtime. After more than 6 months of use I have noticed that gabapentin is taking a toll on my quality of life. Your thoughts please! A.
